Experience

Development Consultant

May 2023 - June 2024

Region Nordjylland

I primarily worked on the further development and maintenance of a system for automatically reporting clinical data from Region Nordjylland to a national database in collaboration with my team. My responsibilities included further developing the backend to accommodate new data providers and testing relevant system components. Additionally, I performed bug fixes and refined the frontend of the web application.

Software Developer

September 2022 - February 2023

Rohde & Schwarz

Successfully migrated and restructured the company's codebase from Engineering Workflow Management to GitLab. Automated critical workflows using Python and shell scripting, significantly improving system efficiency and maintainability.

Education

Software Bachelor

2022

Aalborg University

Bachelor project evaluated driving behavior using raw GPS data to encourage efficient driving. The developed web application provides feedback and highlights which parts of the route driven can be improved, such as reducing hard acceleration at traffic lights.

Translated complex technical concepts into accessible reports and presentations, ensuring clarity and maintaining rigorous documentation standards.

GlobalTech

2018

Aalborg Technical High School

A technical high school education where my electives were Mathematics A and Electrical Engineering A. My study program was "GlobalTech," an international track with Communication/IT A and English A, including one semester in Australia. Additionally, I had a 3-week internship in London as a web designer as part of my education.

Activities

■ Hiking

■ Music experiences

■ Researching topics in my spare time

■ Exploring the world of food
